ZOCKTO

AI Video Generation Without Filming

A Project by SCSIT, DAVV Indore
Guide: Dr. Ugrasen Suman

PROBLEM STATEMENT

Why Traditional Video Creation Falls Short

Expensive Equipment

Cameras, lighting, and studio setups cost thousands

Actors & Crew Needed

Hiring talent and crew adds complexity and cost

Time-Consuming Process

Filming, editing, and post-production takes days to weeks

Technical Skills Required

Video editing software has a steep learning curve

THE SOLUTION

What is Zockto?

Zockto is an AI-powered video generation platform that transforms a single image into a professional talking-head video — no cameras, no actors, no editing skills required.

- Upload any portrait image
- Choose from AI voices in Hindi & English
- Get a ready-to-share video in minutes

HOW IT WORKS

5 Simple Steps to Your AI Video

01

Upload Image

Drag & drop your portrait photo

02

Select Style

Studio, Outdoor, Cafe, Neon...

03

Choose Voice

Hindi or English AI voices

04

Write Script

Enter up to 1000 characters

05

Generate!

AI creates your video

KEY FEATURES

What Makes Zockto Special

No Filming Required
Skip cameras, lighting, and studios entirely

AI-Powered Generation
Advanced AI models create realistic videos

Multi-Language Voices
14+ AI voices in Hindi and English

Fast Processing
Videos ready in under 10 minutes

Multiple Visual Styles
Studio, Outdoor, Cafe, Neon, and more

Simple 5-Step Process
No technical skills needed at all

SYSTEM ARCHITECTURE

How Zockto Works Under the Hood

React Frontend
User Interface

→

Supabase
Auth + Database + Storage

→

Edge Functions
Serverless Logic

→

Webhook API
AI Processing

→

Video Output
Generated Video

Data flows from user input through Supabase to the AI webhook, which processes and returns the generated video.

TECHNOLOGY STACK

Built with Modern Web Technologies

FRONTEND

- React 18
- TypeScript
- Tailwind CSS
- Framer Motion
- Vite 5

BACKEND

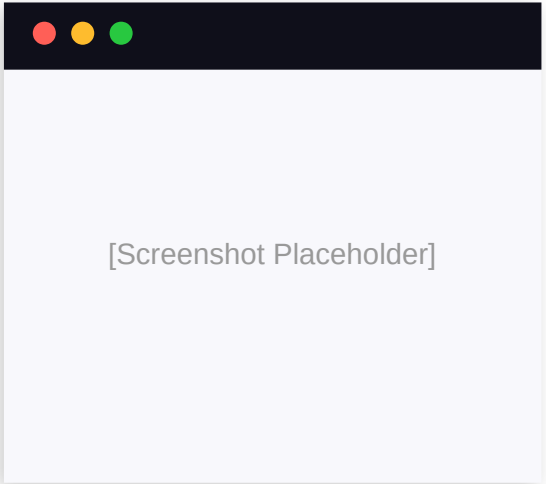
- Supabase Auth
- PostgreSQL
- Edge Functions (Deno)
- Real-time Subscriptions

AI & INTEGRATION

- External AI Webhook
- Voice Generation API
- Cloud Storage
- REST APIs

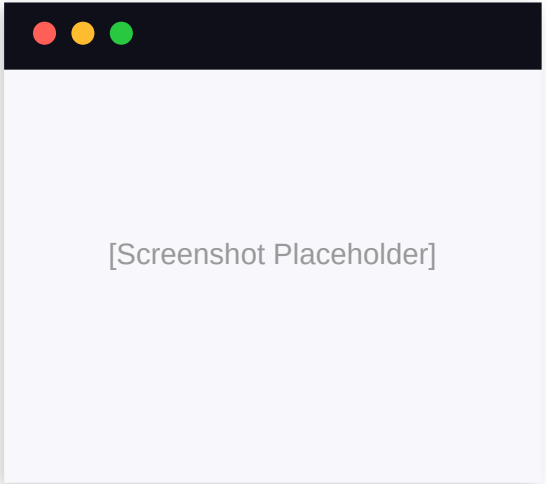
DEMO & SCREENSHOTS

Live Application Preview



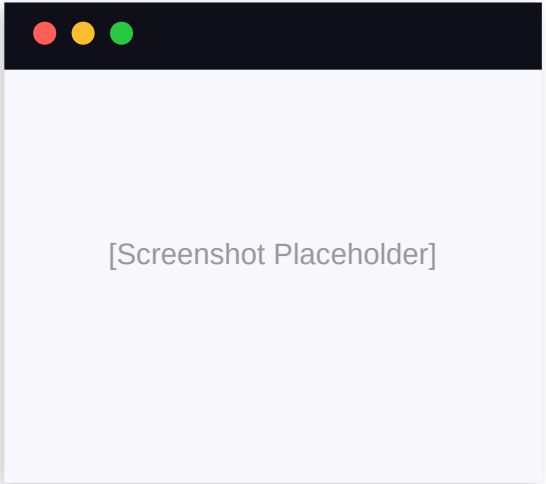
Create Page

5-step wizard for video generation



Voice Selection

14+ AI voices with preview



Results Page

Watch & manage generated videos

Live at: zockto-vision-forge.lovable.app

FUTURE SCOPE

What's Next for Zockto

Custom Voice Cloning

Clone your own voice for personalized videos

Batch Video Generation

Generate multiple videos simultaneously

Public API Access

REST API for third-party integrations

Mobile Application

Native iOS and Android apps

Analytics Dashboard

Track video performance and engagement

More Languages

Expand to 20+ regional and global languages

Thank You!
